# WHY dB Blockers®

dB Blockers cannot be inserted incorrectly.

dB Blockers are comfortable enough to wear for a full shift.

Vented dB Blockers are hearing protection you can hear through. (proprietary vent and filter accentuate speech in noise)

dB Blockers integrate directly with our dB COM line (2-way Radio & Smartphone products earplugs) with consistency in protection.

dB Blockers offer outstanding value with a 90-Day FitRight Warranty and a 3-Year Material Warranty. (5-Year expected lifespan and included implementation materials & service)

dB Blocker molds are made with Skinsoft™ medical grade silicone, the highest grade available, and molds are kept for 5 years.

## dB COM® METAL DETECTABLE Com – Vented

Hearing protector designed for food, pharmaceutical and other industries where radio connectivity and interpersonal communication in noise is required.

This product comes with a permanently attached metal detectable cord and ear piece.

Must be paired with dB Blocker Metal Detectable ear piece in opposing ear. dB Com accessories sold separately.

NRRa 24 | SNR (SF84) - 26

### dB Com® Ready

This product comes with a permanently attached metal detectable cord and ear pieces.

NRRa 24 | SNR (SF84) - 26

### Permanent Cord

## HEARING CONSERVATION

At Custom Protect Ear we care about your hearing health and the responsibility of teaching and practicing good hearing health. We will work with you and your team to develop a comprehensive program designed to prevent hearing loss in workplaces where employees are exposed to hazardous levels of noise.

WARRANTY

## QUALITY AND COMFORT

dB Blockers® are hearing protection products made to fit the individual's ear exactly; this gives the worker a custom hearing protector they can wear all day long, while receiving "REAL WORLD" (what the wearer actually receives) attenuation.

dB Blockers® custom molded hearing protectors are made from the Skinsoft™ blend of medical grade silicones, which is as soft and flexible as your own skin.

## ENVIRONMENT, SOCIAL AND GOVERNANCE

CPE is committed to becoming more sustainable by working to eliminate or offset any adverse effects our business may have on the planet. Some of the programs we initiated are:

- Reducing landfill waste by making our protectors with a 5 year life span, and by reusing, recycling or reclaiming waste materials whenever we can.
- When switching to dB Blockers you are removing disposables which have a direct impact on the environment
- Refining our production processes to engineer out any adverse effects on the environment

## THE CLEAR CHOICE

It's life as it should be. Loud noise and disruptions can get in the way of getting the most out of life. With dB Life, conversations become clearer and more engaging; music reveals background sounds and layering; and a good night's sleep goes uninterrupted.

### SLEEPERS

Effective hearing protection with a low profile design and no cord attachment.

### DISCREET— Vented

Vented and filtered hearing protection with a low profile design and no cord attachment. For situations where interpersonal communication/situational awareness in noise is required.

### SWEET TONES MUSICIANS EARPIECE

Reduces all frequencies equally by 9 db, 15 db or 25 db with corresponding Flat Attenuation Filters.

Designed for musicians who want to hear sound without distortion but with less volume.

## HEARING PROTECTION YOU CAN HEAR THROUGH

Serving over 4,500+ companies and businesses around the globe, our certified mobile technicians do custom on-site fittings at your industrial sites, or at one of our associated retail outlets.

**Custom Protect Ear has a registered ISO 9001 quality management system.**
